

Practices for Women's Empowerment

Challenging Discrimination through Community Conversations: Celebrating Women in our Community In International Women's Day
With guest speakers Adetoun Abby Aiyeleye and Funke Olokude

Work to reduce barriers

Use an intersectional lens when considering issues impacting women to ensure that women of all backgrounds will be uplifted.

Celebrating milestones

As we work to achieve full gender parity, we must not forget to celebrate the milestones and successes that we reach along the way!

Bridging the gender gap

Call out bias when you see it happening. Don't be afraid to make things awkward!

Effects of the pandemic

Women have been particularly impacted by the pandemic as they are often working both inside and outside of the home, including as caregivers for children and family members.

Women supporting women

Women can help to empower other women by mentoring, giving advice, and supporting those who are new to the workforce.
